The Postmaster General has created great consternation among special agents of his department by issuing an order that they should be subjected to a sort of civil service examination, to as certain their fitness for the position they hold. He has, however, somewhat allayed the excitement by announcing that ample opportunity will be afforded them to prepare for the examination.

A review of the produce trade of Chicago for the past year, just published shows the receipts of grain during the year to have been, 96,731,598 bushels; shipments, 91,035,703 bushels; receipts of hogs, 4,360,000; head of cattle, 765,000; sheep, 800,000; lumber, 1,084,998,000 feet have been received. The total value of all the produce, received during the year, is in round numbers, \$240,000,000.

The Government Directors of the Union Pacific Railroad reports that the Company are selling lands at \$4.50 an acre, subject to the subsequent perfection of title thereto by the Government, notwithstanding the prohibition of sale on account of the non payment of interest on the subsidy bonds. It this statement is correct, the purchasers buy at the risk of never receiving a good title, and probably under a misapprehension of the real estate of affairs.

Mr. Cushing is now in his 78d year, and has been identified with political life for nearly half a century. He seems to have found favor with all parties, and acquitted himself honorably in every position. His lengthened years would seem to suggest retirement from the cares of office, and the re-

sponsibility of public trust. It it is totimated in the Washington dispatches that Mr. Cushing's nomination will be confirmed immediately, and without the usual committee reference, and that he will be ready to leave in about three weeks. With the exception of some general suggestions touching the Virginins complication, Mr. Cushing will go to Madrid uninstructed.

Dispatches from Washington within lay or two have stated that it was propos ed to appoint Prof. Edmund Andrews, o Chicago as one of the Regents of Smiths man Institution in place of Prof Agassia The appointment would be, says the Chiof the claims of the West to share in whatever honor and responsibility may attach to the management of the iner in itself, for he is one of the leading scientificmen of the country. Only last winter he proposed a theory of the Geysers,-a problem that had never been solved, though Bunsen and Tyndall had attempted it,-and, by a very simple contrivance, he showed his theory to be correct. Apparatus filustrated all the phenomena of the Guyasts perfectly .-Our Academy of Sciences and all who saw his experiments were perfectly satisfied that the secret of the Geysers was at length revealed. The authorities at Washington would honor themselves and pay a just tribute to the Science of the West by making Dr. Andrews one of the Regents of the Smithsonian institution.

The strike of the engineers on the lines of the Pennsylvania Co., has attracted considerable attention and interest on account of the movement being so extensive and affecting so great an extent of lines. The movement, which at first seemed so powerful, has, however, lost much character from an official manifesto from Chas. E. Wilson, Chief of the Brothhood of engineers who publicly announces that the strike was inaugurated in direct and open violation of the rules, advises those who have quit work to resume again and prevent others from stopping, and warns them not to interfere with the operations of the railroads. The appearance of the manifesto will un doubtedly have a great influence in restoring quiet throughout Indiana and Ohio where the strike is the most general and violent. Notwithstanding the fact Cincinnati, and that one or two attempts of a similar nature were made in Indiana, there is a perceptible improvement in the condition of things. The roads are gradually getting into running order again, and the presence of the militia at various points where the excitement has been the greatest has had a good effect. There is good reason to believe that the worst is over, and that the present week will

witness the end of the strike. Hon, Alex. H. Stephens thinks the colored race ought to have equal protection with the white in their rights, but is of opinion that it pertains to the several States to secure them, and not the Federal government.
